

November 03- November 16

#### Overview

- COVID-19 cases and the percentage of positive tests have been decreasing.
- COVID-19 and RSV-related Emergency Department visits have been stable.
- Influenza-related Emergency Department visits have been increasing.
- In Turlock, Wastewater data shows that COVID-19 has decreased, Influenza has increased, and RSV has not been detected.
- The rise in Influenza A detections in wastewater at the Turlock site is likely driven by increased H5N1 (Avian Influenza) activity rather than a surge in seasonal flu strains.

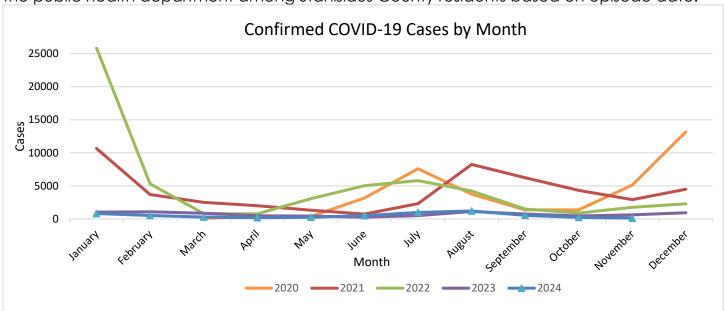

### **COVID-19 MONITORING**

	Report Weeks			Fiscal Year: 23/24			
Age	Case Count	%	Case Rate	Case Count	%	Case Rate*	
0-17	12	12.0%	0.08	1,217	17.6%	8.15	
18-44	22	22.0%	0.11	2,098	30.4%	10.02	
45-64	29	29.0%	0.22	1,634	23.7%	12.65	
65+	37	37.0%	0.50	1,930	28.0%	25.95	
Total	100	-	-	6,877	-	-	
Deaths	0	-	-	59	-	-	

<sup>\*</sup>Rate per 1,000 population; Data Source: Population Estimates used for case rate calculations are from the California Department of Finance.

This graph displays the number of confirmed COVID-19 cases by month & year, reported to the public health department among Stanislaus County residents based on episode date.

Note: Due to delays in specimen processing, data may be incomplete.

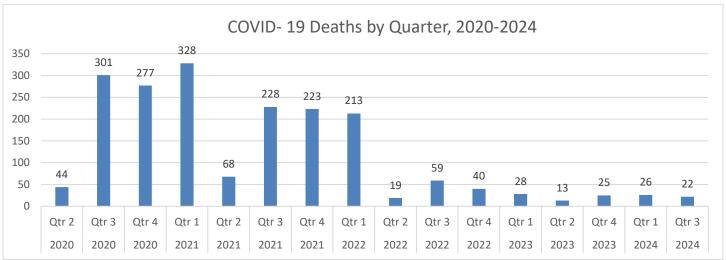

<sup>\*\*</sup> Total Deaths from July 1, 2023, through June 30, 2024. Age groups with less than 10 deaths are not displayed.

November 03- November 16

Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

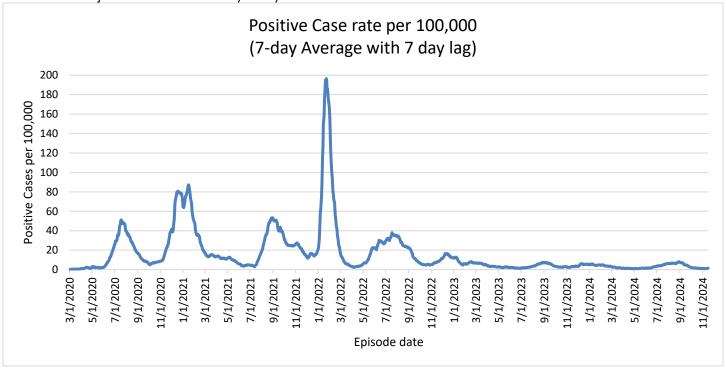

The graph below shows COVID-19 deaths among Stanislaus County residents by quarter and year.

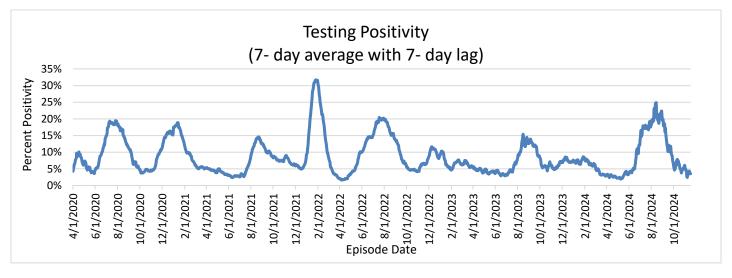

Note: Due to delays in death reporting and assessment, data may be incomplete. Quarters with deaths below 10 will not be shown.

Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

The graph below shows the positive case rate (number of positive cases per 100,000 county population), a 7-day average with a 7-day lag through the report week. It does not include the state adjustments and may vary from state measures.

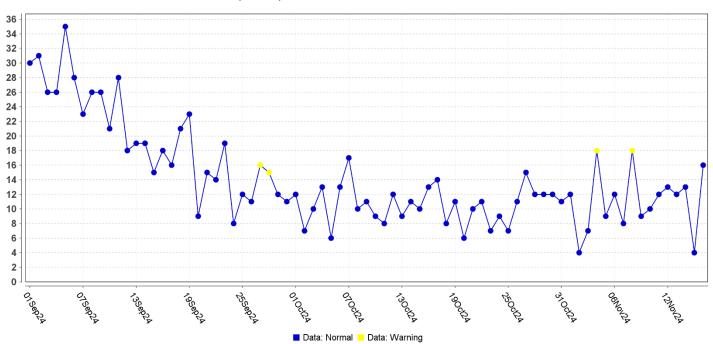

The graph below shows testing positivity (percent of positive tests), a 7-day average with a 7-day lag, through the report weeks. It may vary from state measures.

### COMMUNITY MONITORING – EMERGENCY CASES

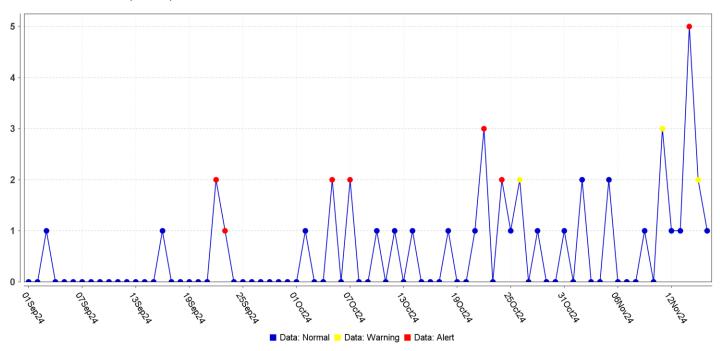

### **COVID-19 MONITORING**

The graph below shows the daily case counts of emergency room visits for COVID-19-like illnesses for all Stanislaus County Hospitals.

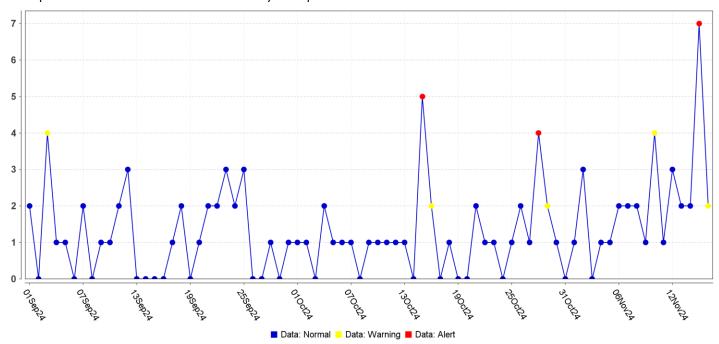

## RSV MONITORING

The graph below shows the daily case counts of emergency room visits for RSV for all Stanislaus County Hospitals.

## **INFLUENZA MONITORING**

The graph below shows the daily count of emergency room visits for Influenza-like illness complaints for all Stanislaus County Hospitals.

Last Updated on November 25, 2024

### SEVERE INFLUENZA

The chart below shows the number of people who are in the intensive care unit and deaths for children under 18 from influenza.

	Report Weeks	This Influenza Year
Intensive Care Unit	0	0
Death under 18 years old	0	0

The influenza year begins MMWR week 40, this year beginning on September 29, 2024.

## Laboratory detections of respiratory viruses other than COVID-19

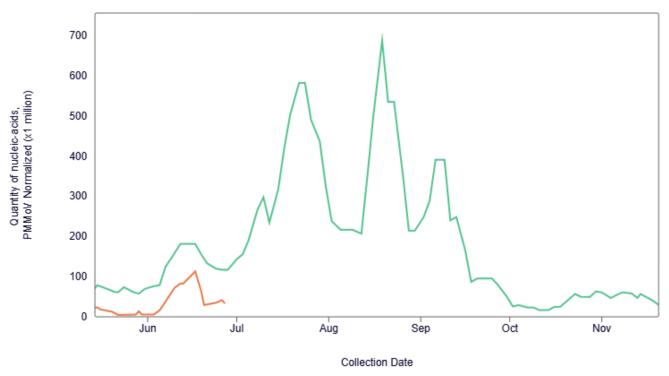

The chart below looks at how many samples were tested for different kinds of influenza-like illness by the regional San Joaquin Public Health Laboratory (including Stanislaus County specimens), during the report weeks, and how many were positive, in order to monitor what is currently spreading in the area.

	Report V	Veeks	This Influenza Year		
	Samples Tested	Positive Tests	Samples Tested	Positive Tests	
Influenza A	9	9	30	29	
Influenza B	9	0	30	1	
RSV	15	1	44	1	
Parainfluenza	15	1	44	2	
Adenovirus	15	0	44	2	
Rhinovirus/Enterovirus	15	4	44	14	
Human Metapneumovirus	15	0	44	0	

Table reference reflects the San Joaquin Public health lab testing numbers.

# COMMUNITY MONITORING – WASTEWATER SURVEILLANCE COVID-19

## SARS-CoV-2, Stanislaus, CA

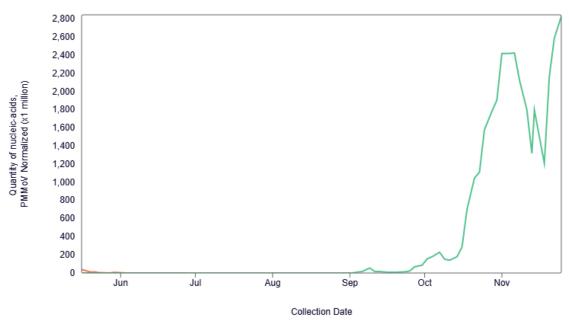

- Sample collected
- Modesto, CA (Modesto's Sutter Primary Treatment Facility)
- Turlock, CA (Turlock Regional Water Quality Control Facility)

November 03- November 16

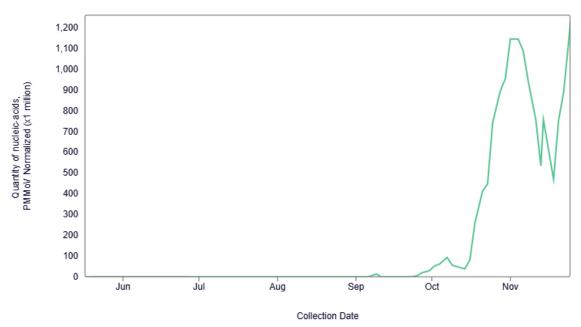

### Influenza

#### Influenza A, Stanislaus, CA

- Sample collected
- Modesto, CA (Modesto's Sutter Primary Treatment Facility)
   Turlock, CA (Turlock Regional Water Quality Control Facility)

#### H5, Stanislaus, CA

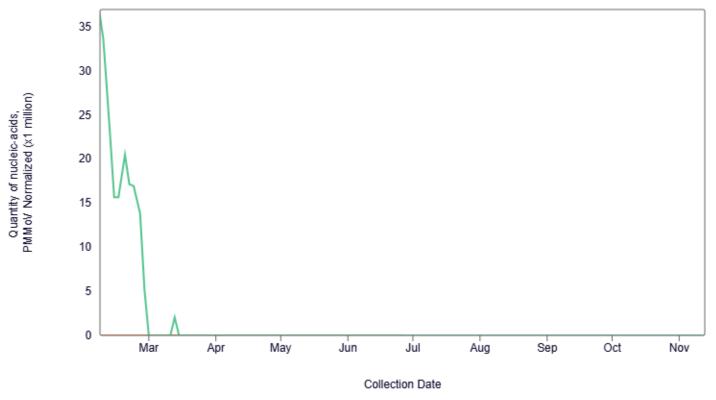

- Sample collected
- Modesto, CA (Modesto's Sutter Primary Treatment Facility)
- Turlock, CA (Turlock Regional Water Quality Control Facility)

November 03- November 16

## **RSV**

## RSV, Stanislaus, CA

- Sample collected
- Modesto, CA (Modesto's Sutter Primary Treatment Facility)
- Turlock, CA (Turlock Regional Water Quality Control Facility)
